

SECTION 9

SUPPLEMENTS

INTRODUCTION

This section of the handbook contains all approved supplements for the FBA-2C3 Expedition E350. These supplements are necessary to safely and efficiently operate the FBA-2C3 when equipped with optional systems or equipment not provided with the standard handbook. The supplements in this section contain additional operational procedures for optional equipment installed in the airplane. Operators must refer to each supplement to ensure that all limitations and procedures appropriate for their airplane are observed.

A *Log of Approved Supplements* is provided and lists all supplements available for the FBA-2C3 at the date shown in the lower left corner. The *Log of Approved Supplements* can be used as a “Table of Contents” for this section. These supplements are listed by supplemental flight manual number, name and revision level. This log should be used as a checklist to ensure all applicable supplements have been placed in handbook. If the airplane is modified at a non Found Aircraft facility through an STC or other approval method, it is the operator’s or the owner’s responsibility to ensure that the proper supplement is installed and logged accurately. A blank *Log of Approved Supplements* table is provided for this purpose.

Each individual supplement contains a *Log of Effective Pages*. This log lists all the pages in the supplement with the page number, and the effective date for each page. Each supplement also contains a *Log of Revisions* to list all the revisions to the supplement. The revision date and the revision level are included in the *Log of Revisions*.

INTENTIONALLY LEFT BLANK

LOG OF APPROVED SUPPLEMENTS

Install	Supp. No.	Supplement Title	Rev.
<input type="checkbox"/>	S01	Aerocet Model 3400 Amphibious Floats	2
<input type="checkbox"/>	S02	Aerocet Model 3500L/3500 Seaplane Floats	2
<input type="checkbox"/>	S03	Auto Pilot (Reserved)	
<input type="checkbox"/>	S04	Garmin G500	1
